

PillCam[®] COLON Capsule Endoscopy - Patient Instructions

You have been scheduled to have a procedure to help your doctor see inside your colon. This is done with the PillCam video capsule, which takes pictures as it travels through your digestive system.

The quality of the video depends on an **absolutely** clean colon! Therefore, it is imperative that you follow these instructions carefully to ensure that your colon is clean during this procedure.

Before the Examination Day

- Read this entire instructions sheet. Contact your doctor if you have any questions.
- Follow the dietary instructions exactly. Do not eat or drink **anything** that is not on your diet plan.
- It is recommended that you refrigerate the laxative solution to make it easier to drink.

During the Examination Day

- Wear loose-fitting, two-piece clothing. Wear a dark-colored shirt that light will not pass through.
- Precisely follow the regimen instructions provided by your doctor.
- Treat the DataRecorder carefully. Avoid sudden movements and do not knock it against anything.
- Do not remove or disconnect the equipment at any time during the procedure.
- Avoid direct sunlight.
- Avoid strong electromagnetic fields such as MRI devices or ham radios after swallowing the PillCam COLON capsule and until you pass it in a bowel movement.

After the Examination

- The procedure is over after the capsule has passed out of your body or the blue DataRecorder light stops blinking (typically 10 hours after capsule ingestion).

Warning:

If you develop nausea, abdominal pain, or vomiting, contact your doctor.

Clear Liquid Diet

✓ Allowed*:

- Water/sparkling water
- Tea without milk or cream

SensorArray Removal

Note:

Do not remove the equipment unless you have been instructed to do so by your doctor.

1. Use the non-adhesive tab to peel off each adhesive sleeve, leaving the sensor inside the sleeve. **Do not pull the wires or remove the sensors from the sleeves!**
2. Remove the DataRecorder shoulder strap or belt.
3. Return all equipment (DataRecorder, SensorArray, and DataRecorder shoulder strap or belt/) to your doctor. Handle carefully.

non-adhesive tab
